MAGENTA AI AT SCALE.
HUMAN AT HEART.

MOBILE WORLD CONGRESS 2026

The circle of sovereignty

**Made by Telekom.
Built for Europe.**

Sovereignty opens up the world

We pave the way to digital sovereignty and make you independent with freedom of choice and self-determination. Our T Cloud Public platform is sovereign by design: from fundamental IaaS to advanced AI capabilities. Our cloud solutions drive AI innovation. Always secure, reliable, and compliant. Made by Telekom. Built for Europe.

Moreover, our infrastructure is sustainable by design: our global data centers run on 100% renewable energy. The Industrial AI Cloud uses renewable power, natural water cooling, and reuses heat with exceptional efficiency (PUE 1.2). The sovereign agents platform is crafted according to our green AI principles.

KEY FACTS

- **T Cloud Public:** Europe's sovereign answer
- **Industrial AI Cloud:** The speedboat to the AI gigafactory
- **Agentic AI:** Autonomous intelligence, sovereign control

The circle of sovereignty

Our world is changing rapidly. Political instability, scarce resources, security risks, and regulatory changes impact business operations on a daily basis. However, these challenges also offer opportunities to build a more secure future using technologies such as generative AI, which is driving breakthrough innovation at an unprecedented speed.

Digitalization is the enabler. T Cloud Public is the foundation. Sovereignty is the thread holding it all together. In a world of uncertainty, it becomes the decisive competitive advantage.

Sovereign transformation needs a sovereign foundation. That's where T Cloud Public comes in – the only hyperscaler alternative for Europe. We combine all the benefits of a public cloud with European DNA: sovereign, scalable, and rich in features, available nationally or across Europe.

With our Industrial AI Cloud built on T Cloud, we are creating the basis for the digital future – the speedboat towards the AI gigafactory where AI computing can now move ahead. Take advantage of sovereign, powerful AI on a hyperscaler level and secure your competitive advantage.

Agentic systems rely on vast computing power. Therefore, access to state-of-the-art infrastructure defines your competitive advantage. With our T Cloud and Industrial AI Cloud,

we will ensure that customers can run their AI applications in a sovereign manner. The data remain in Europe and clients can run their agentic AI applications with real impact.

T Cloud Public
· Europe's sovereign answer for a strategically independent cloud future.
· All software dependency risks mitigated.
· Quickly provisioned, deployed, and integrated.
· National sovereignty through local data centers.

Industrial AI Cloud
· Sovereignty by design: built on T Cloud, owned and operated by Telekom.
· Hyperscaler power without dependency: cutting-edge NVIDIA technology, world-class performance.
· Speed of execution: from an idea to production within weeks, fully GDPR-compliant.
· Powered by 100% renewable energy and highly efficient: power usage effectiveness (PUE) of 1.2.

Agentic AI
· Telekom's sovereign infrastructure for AI agents.
· Unlocks your data potential.
· GDPR-compliant data processing.
· Bridging data stored in multiple databases.
